SRS/SDD Self-Review Report – Review 2

Form BM02. Run the standard prompt on the proposed final registration form and the repository at tag review-2. Keep every finding exactly as produced by the AI; add only the Team response column. Export to PDF. File name: SWP490_<ProjectCode>_R2_SelfReview.pdf

1. Run Information

Project code	FA26SE183
Project name	VISTA — Robotics & AI Education Platform
Team	GFA26SE94
Supervisor	Lâm Hữu Khánh Phương (phuonglhk@fpt.edu.vn)
AI tool and model	PENDING — run unmodified standard prompt
Run date	PENDING
Repository tag / commit	Registration v1.2 PROPOSED; Git tag review-2 NOT VERIFIED; BM02 pending exact prompt execution
Registration form version used	Registration v1.2 PROPOSED; Git tag review-2 NOT VERIFIED; BM02 pending exact prompt execution
Version	Registration v1.2 PROPOSED; Git tag review-2 NOT VERIFIED; BM02 pending exact prompt execution
Date	26/10/2026

2. Standard Prompt

Use this prompt without modification.

```
You are reviewing the SRS and SDD of a software capstone project against its
registration form and source code. Report only; do not change any file.

Inputs: the registration form, SRS, SDD (with diagrams), source code and
database script in this repository.

Check:
1. Scope: FRs in the SRS not covered by the registration form, and
   registration items with no FR.
2. Requirements: FRs without an actor or testable acceptance criteria;
   NFRs without metric, threshold and measurement method.
3. Data: entities missing from the Logical ERD; ERD entities or attributes
   missing from the database script, and tables not in the ERD.
4. States: for each main entity, states used in code but missing from its
   state machine; transitions with no triggering FR; states with no exit.
5. Flows: main business flows in activity diagrams with no implementation
   or no test.
6. Architecture: components or third-party services in code but not in the
   architecture diagram, and the reverse.
7. Design vs code: modules, APIs or business rules implemented differently
   from the SDD.

Output one table: ID | Category | Location | Finding | Severity
(High/Medium/Low) | Evidence. Then list the 5 most important findings.
```

If something cannot be verified from the repository, say so; do not guess.

3. Findings and Team Response

Team response: Fixed (link to commit) · Kept (reason) · Planned (owner and due date). Do not delete any finding.

ID	Category	Location	Finding	Severity	Evidence	Team response
SR-01	*Data*	*SDD §4 ERD*	*Entity Voucher used in code but missing from ERD*	*High*	*Voucher.java*	*Fixed – commit a1b2c3d*

4. Top 5 Findings (as reported by the AI)

#	Finding ID	Summary

5. Summary

Severity	Total	Fixed	Kept	Planned
High				
Medium				
Low				

Every High finding marked Kept or Planned must also appear in section 5 (Known Gaps) of the Design Brief.
