SRS/SDD Self-Review Report – Review 2

Form BM02. Run the standard prompt on the proposed final registration form and the repository at tag review-2. Keep every finding exactly as produced by the AI; add only the Team response column. Export to PDF. File name: SWP490_<ProjectCode>_R2_SelfReview.pdf

1. Run Information

Project code	FA26SE183
Project name	VISTA — Robotics & AI Education Platform
Team	GFA26SE94
Supervisor	Lâm Hữu Khánh Phương (phuonglhk@fpt.edu.vn)
AI tool and model	Claude 3.5 Sonnet / Antigravity Agent
Run date	27/10/2026
Repository tag / commit	Tag review-2 (commit 4626e37)
Registration form version used	Registration v1.2 PROPOSED
Version	v1.0 (Review 2 Official Submission)
Date	27/10/2026

2. Standard Prompt

Use this prompt without modification.

```
You are reviewing the SRS and SDD of a software capstone project against its
registration form and source code. Report only; do not change any file.

Inputs: the registration form, SRS, SDD (with diagrams), source code and
database script in this repository.

Check:
1. Scope: FRs in the SRS not covered by the registration form, and
   registration items with no FR.
2. Requirements: FRs without an actor or testable acceptance criteria;
   NFRs without metric, threshold and measurement method.
3. Data: entities missing from the Logical ERD; ERD entities or attributes
   missing from the database script, and tables not in the ERD.
4. States: for each main entity, states used in code but missing from its
   state machine; transitions with no triggering FR; states with no exit.
5. Flows: main business flows in activity diagrams with no implementation
   or no test.
6. Architecture: components or third-party services in code but not in the
   architecture diagram, and the reverse.
7. Design vs code: modules, APIs or business rules implemented differently
   from the SDD.

Output one table: ID | Category | Location | Finding | Severity
(High/Medium/Low) | Evidence. Then list the 5 most important findings.
If something cannot be verified from the repository, say so; do not guess.
```

3. Findings and Team Response

Team response: Fixed (link to commit) · Kept (reason) · Planned (owner and due date). Do not delete any finding.

ID	Category	Location	Finding	Severity	Evidence	Team response
SR-01	Scope	SRS §3.1 / §3.1.2	Narrative in SRS §3.1 cites "FR-01 to FR-06" while feature table defines 8 mandatory requirements (FR-01 through FR-08)	Low	SRS §3.1 narrative text vs Table 3.1.2 which includes FR-07 (Assessment) and FR-08 (AI Metadata)	Fixed – commit 22fff34 (reconciled in Table 3.1.2 to cover all 8 FRs; narrative text kept for core backend sprint)
SR-02	Flows	SDD §2.2 / Activity WF-03	Physical robot execution branch (CHECKIK runtime dispatch) in WF-03 is modeled as active but physical hardware tests remain pending lab access	High	Report 5 test suite has 82 automated tests passing for schematic mode; physical E2E execution is pending lab hardware readiness	Planned – lead by Duc (WF-03 owner), physical CHECKIK hardware lab E2E test scheduled for sprint post-Review 2 (target 15/11/2026; mapped to G-01)
SR-03	States	SDD §2.3 / State 08	State Machine 08 defines QUEUED state between CREATED and RUNNING, which schematic execution bypasses in current in-memory runner	Medium	services/ education-api transition schematic directly to RUNNING without an intermediate persistent queue broker	Kept – synchronous deterministic schematic execution completes in <100ms; persistent QUEUED state is reserved for physical robot dispatch
SR-04	Architectu re	SDD §2.1 / C4 Level 2	Mobile client application (apps/mobile Expo React Native) tracked in repository is not shown in C4 Level 2 Container Diagram	Low	Git branch chore/review2 -track-vista- mobile and apps/mobile/ exist in repository but C4 Level 2 only displays Web Client and API	Planned – mobile client is secondary learner surface; C4 Container diagram update scheduled for Review 3 release baseline
SR-05	Data	SDD §4 / Database Schema	Internal landing/operational tables (audit_logs, leads, demo_bookings) exist in database schema but are excluded from Education Logical ERDs	Low	services/ backend/ prisma/ schema.prism a contains leads, demo_bookin gs; Report 4 Logical ERDs focus strictly on education	Kept – intentional separation of concerns; education logical ERDs represent student/teacher core domain, landing tables are isolated

ID	Category	Location	Finding	Severity	Evidence	Team response
					core domain	
SR-06	Requirements	SRS §4.2 / NFR Performance	NFR Performance targets (50 req/s throughput, P95 <= 3.0s latency) lack automated load test report artifacts in Report 5	Medium	Report 5 covers 82 functional and authorization unit/integration tests; load/stress benchmark report is not attached	Planned – load testing with k6 in staging environment scheduled before final deployment defense (target 20/11/2026)
SR-07	Design vs code	SDD §3.2 / Blockly AST	Blockly visual code compiles to AST JSON on client rather than backend parsing raw script text	Low	web/robot-edu Blockly workspace generates structured JSON AST sent to POST /experiments; backend validates AST schema	Fixed – commit 1954d4b (designed security choice preventing remote code execution; documented in SDD §3.2)

4. Top 5 Findings (as reported by the AI)

#	Finding ID	Summary
1	SR-02	Physical robot execution branch (CHECKIK runtime dispatch) in WF-03 is modeled but physical hardware test is pending lab access (High / Planned - G-01).
2	SR-06	NFR Performance throughput (50 req/s) and latency targets lack automated load test report in Report 5 (Medium / Planned).
3	SR-03	State Machine 08 QUEUED state bypassed in local synchronous schematic simulation mode (Medium / Kept).
4	SR-04	Mobile client application tracked in repository is not reflected in C4 Level 2 Container Diagram (Low / Planned).
5	SR-05	Operational landing tables exist in Prisma schema but are excluded from Education Logical ERDs (Low / Kept).

5. Summary

Severity	Total	Fixed	Kept	Planned
High	1	0	0	1
Medium	2	0	1	1
Low	4	2	1	1

Every High finding marked Kept or Planned must also appear in section 5 (Known Gaps) of the Design Brief.
